Re: Cobra Construction Company

We have worked on several multi-family projects with Cobra Construction Company and have found their professionalism and knowledge of providing a complete building envelope system to be excellent. Their projects are well managed to insure a timely delivery. Their field staff is thoroughly trained in water-intrusion prevention so we know with confidence our repair details are being followed. We would highly recommend them as a contractor to work with any Homeowners' Association or Property Manager who needs guidance in detail review with competitive pricing of their remediation project.

Sincerely,

Robert Steimer
